MACHRACE : CONTROLS

What can I say, quite a fun and enjoyable game. It looks great, the different ships are all beautifully designed. The world rankings are there to\u2665\u2665\u2665\u2665\u2665me off every single time I can't beat them. It put me right in that competitive mode...ready to beat anyone and have my name on top of all others. As an Early access game it's fantastic. Great job and I can't wait to see where it goes from here.. this game kool to me.
im going to give some pros. and cons.

pros

great first few ships

good race way

nice luncher but wish there was a blur start up

cons

at the moment there is no options to lurn

contruls, or to change any settings

other than that this game is worth the price if you like planes.

. Certified fast. Actually too fast, the game is seriously difficult from the very start.. I like this :D. Very cool game. You can choose between 4 gliders.

Goal is it to reach a particular speed and avoid barricads to get to the boss an beat him.

The game is still at the start so there is in the moment only 1 track but more will come.

For me the game has very good potential. I'm excited how it will proceed.. This game is super laggy, and I can't turn down the graphics because there are not settings at all, do not purchase this game if you don't have a super pc, (gaming pc).. Very pleasant game
